

COMPENG 2SH4 Project – Statement of Contribution

Your Group Name WeWill12

Your Name Julia Palumbo

Your Team Member's Name Jason Baik

You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.

- Completed iteration 2A.
- Helped with anything small on other iterations.
- Debugging
- Checked for memory leakage
- Completed half of the peer evaluation.

2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.

- Completed Iteration 1, 2B and 3
- Completed other half of the peer evaluation.

3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.

Overall, I had a good experience working on my first collaborated software development project. I was able to use my work from the PPA's, tutorials as well as course content to help guide me through the project. I think something I wish I could have done better for next time was be more confident in the material through more practice. I found that I was not as confident or as fast at coding as my partner was and I want to improve on that for the future.
